

DIY & DECOR

SATIN
FINISH
and
RICH
COLORS

Decor & DIY Paints are perfect for your home decor, DIY and repurpose projects. The paint will adhere to virtually any surface and dries with a smooth, professional finish. Bring new life to raw wood furniture, vintage finds, metal accessories damaged furniture, and more.

DIY & DECOR FUN FACTS:

- Terrific for craft projects too
- Paint indoors with no harsh fumes or danger
- Levels to a beautiful finish
- Made in the USA
- High quality materials make paint longer lasting
- Mix colors to match your own palette
- Add white to lighter and dark color to deepen
- The paint really sticks to wash brushes quickly
- For slick surfaces, paint a thin coat and when dry, add a second coat
- We mean it - no sanding or priming

DIY & DECOR paint is the Tattered Angels answer to Milk and Chalk paints on the market, only better! This specially-formulated paint covers furniture and accessories beautifully, but it does so much more.

DURABILITY: a formula that withstands the wear and tear of amazing creativity. This paint will not scratch off like other paints and with a few coats, your painted surface will become even more durable.

SMOOTH FINISH: after drying, chalk, milk, craft and other paints can be dry looking, have a gritty, chalk feel and must be waxed for a shiny finish. Our finish has a smooth sheen that is not too glossy, not too matte, but just right.

NO SANDING: our paint will adhere to almost any surface without sanding or priming. We do recommend when painting raw wood that you sand any rough edges, clean the surface completely and allow it to dry.

INDOOR AND OUTDOOR: this paint is durable enough for outdoor and indoor projects.

SELF-LEVELING : no need to try and remove brush strokes, they will self-level as the paint dries.

WATER-SOLUBLE: clean up is a breeze with our paint, just soap and water is all that is required

NO PREMIXING: our paint is pre-mixed and ready to go... unlike other paints in a powder form

or must have other items added to them.

LOW VOC: environmentally friendly formula has low VOC's, which allows you to paint inside with no special ventilation and low smell.
